A 2023 Memorandum to the State of Israel concerning the existence and influence of Mars on regional security and Gaza militant rocket fire. Also, a warning that severe escalation could occur between August and November of 2023.

For three consecutive years in 2020, 2021, and 2022, I predicted the time-frame that an increased number of Gaza rockets would be fired into Israel relative to the rest of the year, all by observing the position of the planet Mars in relation to the lunar node. The thesis is that when Mars is within 30 degrees of the lunar node, Gaza militants fire a greater number of rockets at the state of Israel relative to the rest of the year. Since 2007 Gaza militants are influenced by this planet, the ancient god of war. The same god of war that backed the Romans when they sacked the temple in AD 70. The dates of Mars being within 30 degrees of the lunar node were set back in 2019 in Ares Le Mandat. Here is the earliest source. Go to the end of chapter 24 to see the list of dates for expected increased rocket fire relative to the rest of the year
